Safe Harbor Statement

This presentation has been prepared by the Company solely to facilitate the understanding of the Company’s business model and growth strategy. The information contained in this presentation has not been independently verified. No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or the opinions contained herein. None of the Company or any of its affiliates, advisers or representatives will be liable (in negligence or otherwise) for any loss howsoever arising from any use of this presentation or its contents or otherwise arising in connection with the presentation.

This presentation contains forward-looking statements and management may make additional forward-looking statements in response to your questions. Such written and oral disclosures are made pursuant to the Safe Harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward looking statements include descriptions regarding the intent, belief or current expectations of the Company or its officers with respect to its future performance, consolidated results of operations and financial condition. These statements can be identified by the use of words such as “expects,” “plans,” “will,” “estimates,” “projects,” or words of similar meaning. Such forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may differ materially from expectations implied by these forward-looking statements as a result of various factors and assumptions. Although we believe our expectations expressed in such forward looking statements are reasonable, we cannot assure you that they will be realized, and therefore we refer you to a more detailed discussion of the risks and uncertainties contained in the Company’s annual report on Form 20-F as well as other documents filed with the Securities & Exchange Commission. In addition, these forward looking statements are made as of the current date, and the Company does not undertake to update forward-looking statements to reflect future events or circumstances, unless otherwise required by law.
Declining Cost Drives Adoption

Investment and GW deployment of renewables will continue to grow owing to declining cost/watt, particularly for solar.

Source: J.P. Morgan Analyst Research Report
Global PV Installation Continue to Grow

Growth Drivers
- Grid Parity
- Environment Preservation
- Energy Security

Source: Global PV module demand assumptions from IHS, Bloomberg and analyst research reports
We Are at the Very Early Stages of Solar Adoption

Solar energy will grow from ~2% of global electricity generation today to >10% by 2030

Global Cumulative Solar PV Installations (GW)

Canadian Solar’s key markets such as China, U.S. India and Japan are significantly under-penetrated

Solar PV installed capacity is forecast to grow to over 1,835 GW in 2030.

Source: EPIA, IHS, EIA, Canadian Solar Analysis; Cumulative Installations as of the year 2017.
Company Overview

- Founded in Ontario, 2001
- Listed on NASDAQ (CSIQ) in 2006
- Over 12,000 employees globally
- Presence in 20 countries / territories
- > 27 GW of solar modules shipped cumulatively
- > 3.8 GWp (1) solar power plants built and connected (incl. Recurrent)

Global Footprint and Brand

Q1 2018 Revenue: $1.42 billion
Q1 2018 Shipment: 1,374 MW
2018 Shipment Guidance: 6.6 GW to 7.1 GW
2018 Revenue Guidance: $4.4 billion to $4.6 billion

Source: Company information as of May 16, 2018
1. Includes solar power projects built and connected by Recurrent Energy before acquisition by Canadian Solar in 2015
Energy Business: Globally Diversified Project Pipeline

9.2 GWp
Total project development pipeline

6.9 GWp
Early to mid-stage development pipeline (2)

~2.3 GWp
Total late-stage project pipeline (1)

~948 MWp
Solar power plants owned and operated

Priority Markets for Utility-scale Project Development

Source: Company information as of May 16, 2018
Note: (1) Late-stage project pipeline, nearly all projects have an energy off-take agreement and are expected to be built within the next 2-4 years. Some projects may not reach completion due to failure to secure permits or grid connection, among other risk factors.
(2) Early to mid-stage of development: includes only those projects that have been approved by our internal Investment Committee or projects that are expected to be brought to the Investment Committee in the near term.
U.S. Utility-scale Solar Project Pipeline

**Market Leader in the U.S.**

- **4.5 GWp**
  Early to mid-stage pipeline

- **459 MWp**
  Late-stage pipeline\(^1\)

- **499 MWp**
  Owned and operated\(^2\)

**U.S. Late-stage Project Development Footprint**

- **Roserock**
  104 MWp
  Commercial Operation since Q4 2016

- **NC 102**
  102 MWp
  In Construction, Commercial Operation in 2018

- **Gaskell West 2**
  147 MWp
  Under Development, Commercial Operation by 2020

- **Mustang Two**
  210 MWp
  Under Development, Commercial Operation by 2020

Source: Company information as of May 16, 2018

1. Includes all of Canadian Solar and Recurrent Energy’s projects developed and in construction
2. It represents the Gross MWp owned by Canadian Solar
Japan Utility-scale Solar Project Pipeline

351.3 MWp
Late-stage pipeline

85.6 MWp
Owned and operated

Yamaguchi plant: 24 MWp

Total Solutions Business – Japan

Utility-scale COD Schedule1 - MWp

2018 | 2019 | 2020 | 2021+
--- | --- | --- | ---
72.7 | 97.5 | 45.3 | 135.8

Note: (1) Expected COD are tentative estimates subject to change, due to delays in securing all the necessary permits among other risk factors.

➤ 351.3 MWp late-stage projects have secured interconnection agreements and FIT, including 122.7 MWp in construction and 228.6 MWp under development

➤ Projects in the bidding process 9.4 MWp

Competitive Pipeline of Homegrown Technologies

1% cell efficiency and 12 watts module power gain on 60-cell module design over baseline; cell efficiency reached over 20% in mass production.

Over 4 years in-house R&D, **self-owned IPs**

~1GW in-house multi cell production used this technology at the end of 2017

Pleasing aesthetics

---

Mono PERC enhances back side passivation and increased cell efficiency to 21.5%.

Low Light Induced Degradation (LID), and Potential Induced Degradation (PID) resistant.

Premium product: 60-cell module power reached over 305 Watt.

100% mono cell production has been upgraded to mono PERC at the end of 2017.
Cell Efficiency Roadmap

Cell Efficiency

- **P3** nano-texturing technology paves the way for diamond-wire sawing in multi-crystalline wafer production
- **P4** will improve the multi-crystalline cell efficiency to above 21.4% in 2020
- Mono PERC cell efficiency can reach above 22.5% in mass production by 2020
- PERC technology is expected to fully replace Al BSF by the end of 2018
